

## Energy Audit Services (EAS)

### ENERGY AUDIT SERVICES (EAS)

Energy Cost forms a significant part of operational costs across the globe, as high as 30% in process industries.

Technological changes have also forced organisations to re-look at energy management with an objective of optimising energy costs and utilisation particularly when cost management and control is becoming difficult day by day with increasing Overheads and shrinking Profit margins.

Energy Audit services focus on the following Areas:

- Air Conditioning and Chilled Water Systems
- Electricity
- Boiler House, Steam and Condensate Recovery
- Compressed Air

In all the above areas, along with our professional associates (with excellent track records and proven performance), we would be conducting the audits, while simultaneously training the operating personnel concerned at client organisations.

### HOW IS ENERGY AUDIT USEFUL?

EAS can help your organisation in:

- Accurate identification and analysis of energy consumption and distribution
- Clear targeting of recurring savings of up to 10% on Energy Bills
- Energy Audits often lead to Investment proposals with payback periods which are quite often of a duration of one year
- Accurate information on the utilization of your installed assets with full cost ownership.

### EXPECTED TIME FRAME

A typical Energy Audit takes 4 weeks for industry and 2 weeks for Hotels and hospitality sector, depending on the inclusions and exclusions which are plant specific.

Following the audit, final recommendations will be submitted.

### TAKE A GOOD LOOK AT YOUR ENERGY COSTS TODAY

EAS is fast catching up among organisations the world over, be it in Manufacturing or Hospitality Services; Medium or Large in size; for profit or non-profit organizations.

*Get in touch with us today*
